
Foreword

**US Army Corps
of Engineers®**

The USACE *Design Guide for Interiors* provides a comprehensive reference document to assist USACE designers; Major Army Commands; Directorates of Public Works; facility users; and contract architectural, engineering, and interior design firms in the development of excellent interiors. It complements other criteria such as Architectural and Engineering Instructions, Design Criteria, DA Standard Designs, Engineering Regulations (ER), and selection resources, and is applicable to new construction, renovation, and maintenance and repair of building interiors.

This design guide was prepared by the U.S. Army Engineer District, Omaha, Technical Center of Expertise for Interior Design, utilizing a contract with Leo A. Daly Planning/Architecture/Engineering/Interiors, Omaha, Nebraska.

Following initial distribution, copies of this document will be available from the USACE Publications Depot, 2803 52nd Avenue, Hyattsville, Maryland 20781; telephone number 301-394-0081. This document supersedes the *Design Guide for Interiors*, December 1982.

We will continue to work to improve interior design criteria and the process for procuring interior finishes and furnishings. This design guide is a living document and users are requested to address recommendations for changes and improvements, with their rationale for proposed changes, to HQUSACE, ATTN: CEMP-EA, Washington, DC 20314-1000.

For The Director Of Military Programs

A handwritten signature in black ink, appearing to read 'Kisuk Cheung'.

Kisuk Cheung, P.E.
Chief, Engineering Division
