IN-SITU THERMAL REMEDIATION

EM 1110-1-4015

28 August 2009

Paragraph 10.2.1.2: The last four sentences of Paragraph 10.2.1.2 are hereby changed as follows:

At sites having buried ordnance or sealed vessels, that might generate explosive pressures when exposed to high temperatures, special precautions are needed to exclude personnel from the vicinity during heating. These precautions include removing the UXO by a UXO qualified contractor, from the known subsurface footprint of the project prior to installing the equipment or having a UXO qualified contractor on stand-by (reference EM 385-1-97, Chapter I, paragraph I.1.A.02 and Chapter III). An Explosives Safety Submission (ESS) will be required (IAW EM 385-1-97 appropriate Appendix) for UXO contractor support when the probability of encountering UXO is moderate to high.
