Safety

Explosives Safety and Health Requirements Manual

EM 385-1-97

15 September 2008

Pending the next update to this EM, the following paragraphs in Chapter I, Section 1, are updated as indicated (underlined text is new or revised).

I.1.A.02.02b(1): For standby support and subsurface removal, the UXO team will consist of a minimum of two UXO-qualified personnel (one UXO Technician III and one UXO Technician II).

I.1.A.02.02b(2): Delete

I.1.A.03.03: Detailed procedures for the completion and submission of an ESS are contained in DOD 6055.09-STD and applicable appendices of this manual.

I.1.A.03.04: An explosives site plan (ESP) or, when appropriate, a CWM site plan (CSP) is required for MRS investigations or characterizations (i.e., SI, EE/CA or RI/FS) that involve the intentional physical contact with MEC or CA, regardless of configuration. Such site plans will address areas (e.g., magazines) used for the storage of commercial or military demolition explosives, MEC or CA, regardless of configuration; planned or established demolition or disposal areas; and the MRA, MRS, or response area boundaries. MRS investigation and characterization are used to collect the information needed to design the required munitions response and to prepare, as appropriate, an ESS or CSS for the selected response.

I.1.A.05.02: Other safety considerations are discussed in Chapter I, Section 2 and ER 385-1-95 and include: MEC safety precautions; MEC storage; MEC transportation on-site and off-site; EZ operations; MEC excavation operations; and MEC disposal operations.

I.1.E.01: All accidents will be reported IAW current USACE guidance provided below. This guidance supplements procedures in AR 385-10, DA Pam 385-40, and EM 385-1-1.

I.1.F: DETERMINATION OF GOVERNMENT SAFETY OVERSIGHT > *Refer to ER 385-1-95 and EP 75-1-3*

I.1.F.02 thru I.1.F.04: Delete
